

## Peloton Financials and Indirect Procurement Accelerator for Oracle Cloud ERP

Oracle Fusion Cloud Procurement, part of Oracle Cloud ERP, is a comprehensive solution that streamlines and automates the procurement management process, including the evaluation, selection, and creation of formal contractual agreements, as well as managing ongoing supplier relationships.

Peloton Consulting Group offers a suite of accelerators to enhance the Oracle Fusion Cloud Procurement experience. Our Financials Accelerator, a foundational module, includes core components like Financials, General Ledger, and Accounts Payable, fostering streamlined operations, automation, and real-time insights. Building upon this foundation, Peloton introduces the Indirect Procurement Accelerator, a seamless extension of our Financials Accelerator that optimizes procurement operations for indirect goods and services.

Peloton's Indirect Procurement Accelerator expedites the implementation of Oracle Fusion Cloud Procurement for indirect goods and services, leveraging the Financials Accelerator as a prerequisite. This holistic approach ensures a comprehensive optimization of procurement processes, driving organizational success through efficiency and strategic decision-making.

Our Indirect Procurement Accelerator encompasses modules crucial for indirect procurement, including Self-Service Procurement, Purchasing, and Supplier Portal. These integrated solutions enhance operational efficiency and facilitate improved supplier management, complementing the functionalities of the Financials Accelerator.

### Benefits

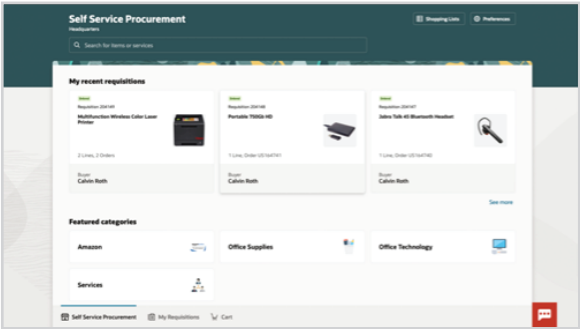

- **Shortened Time to Value:** Accelerated implementation enables customers to realize Oracle Fusion Cloud Procurement benefits sooner, enhancing ROI for indirect goods and services.
- **Enhanced Supplier Management:** Real-time visibility into supplier performance and automated workflows empowers proactive supplier management, driving improved performance and cost savings.
- **Streamlined Procurement Operations:** Automated workflows and preconfigured templates reduce errors and streamline processes, enhancing operational efficiency.
- **Customized Solutions:** Tailored implementations align Oracle Fusion Cloud Procurement with specific business needs, maximizing effectiveness for indirect procurement.

### Functionality

- **Rapid Implementation:** Reducing setup and configuration timelines expedites value realization for Oracle Fusion Cloud Procurement.
- **Supplier Performance Analytics:** Leveraging analytics provides insights into supplier performance, enabling informed decision-making and proactive supplier management.
- **Preconfigured Templates:** Streamlining deployment through preconfigured templates and best practices minimizes customization needs, accelerating time to value.
- **Automated Procurement Workflows:** Automating procurement processes from requisition to payment ensures seamless workflow automation and reduces manual intervention.

Implementation  
Time to Value  
**13 Weeks**

Peloton's Indirect Procurement Accelerator for Oracle Fusion Cloud Procurement empowers customers to unlock value rapidly, optimize procurement operations, and drive indirect goods and services for efficiency.
