ERP, EPM & SCM Cloud Go Live

R1 RCM | Chicago, IL | www.r1rcm.com

Industry: Life Sciences

Products and Services Live: ERP & EPM Cloud

Systems Replaced: Infor Lawson, Netsuite

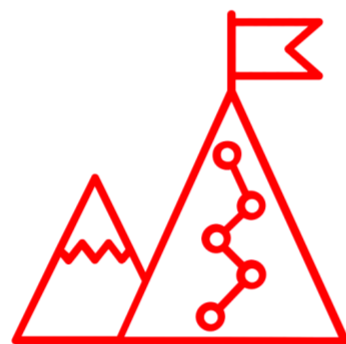

R1 RCM is a healthcare revenue cycle management company servicing hospitals, health systems and physician groups across the United States. They provide end-to-end revenue cycle management services as well as modular services targeted across the revenue cycle including pre-registration, financial clearance, charge capture, coding, billing and follow-up, underpayments, and denials management.

Project Overview

Before becoming R1 RCM, the client was known as Accretive Health, and in 2016 Peloton helped transition their on-premise Hyperion environment to the Cloud. After becoming R1 RCM, the client embarked on its Finance Transformation journey to standardize all their financial systems and centralize their operations in the cloud across multiple countries beyond the United States (United Kingdom, India, New Zealand & Lithuania).

Having had a continued and successful relationship with Peloton, R1 RCM chose us to complete their multi-pillar implementation of ERP and EPM Cloud.

Business Challenges

R1 RCM changed significantly via organic growth and acquisition over several years and needed to improve their back office systems to support their growing complexity. R1 was looking for a modern and scalable solution that would enable continued growth and facilitate process improvement across the organization.

- Fragmented financial systems
- Lacked process standardization
- Needed visibility and accessibility across stakeholders

Key Accomplishments

With multiple acquisitions and a globally dispersed workforce, Peloton's Breakaway methodology was a key differentiator. The methodology focuses on training and change management throughout the implementation process, enabling successful and expanded end-user adoption.

- Full Suite Implementation and Adoption:
 - ERP Cloud Financials - GL, AP, Invoice Scanning, Fixed Assets, Cash, AR
 - Projects
 - Procurement
 - EPM Cloud - Financials and Workforce
- Global Delivery - Peloton's Global Delivery Center of Excellence in Hyderabad supplemented the on-shore delivery components and was able to provide onsite support for R1's India operations.

Why Peloton Consulting Group

Expertise in
Oracle ERP and EPM Cloud
in North America

Peloton Consulting has enjoyed a sustained relationship with R1 via several successful engagements over a number of years. R1's trust in Peloton as well as continuous business coaching, differentiated the Oracle/Peloton solution as the right solution. Peloton's focus on customer service and Breakaway methodology assured the client that the Oracle Cloud project would be successful.
